India Business – Market Leadership

Sale of branded formulations in India for Q3FY18 was Rs. 2,085 crores, up 6% and accounting for 32% of total sales. For the 9 month period, sales were at 6,067 crores, up by 4% over same period last year. Sales growth for

the quarter and nine month period is not strictly comparable to YoY periods due to GST implementation. While there is a gradual recovery post the implementation of GST in India; the underlying growth remains robust.

Sun Pharma is ranked No. 1 and holds approximately 8.5% market share in the over Rs. 116,000 crore Indian pharmaceutical market as per December-2017 AIOCD-AWACS report. As per latest SMSRC report, Sun Pharma is ranked no. 1 based on share of prescriptions with 11 classes of doctors. The ranking in the ophthalmology segment has improved to No. 1 compared to No. 2 previously. For Q3FY18, the company launched 16 new products in the Indian market.

US Formulations

Sales in the US were US\$ 328 million for the quarter, a de-growth of 35% over same period last year and accounted for 32% of total sales. This decline was driven by the overall pricing pressure in the US generics market and the YoY reduction in sales of generic Imatinib and Olmesartan authorized generics. For the 9 month period, sales were US\$ 988 million recording a de-growth of 41% over same period last year. Sales for nine month last year included the benefit of generic Imatinib exclusivity which expired in July-2016. Besides Imatinib, the overall pricing pressure in the US generics market and lower authorized generic sales also impacted the YoY growth.

At the same time, Taro posted Q3 FY18 sales of US\$ 156 million, down 30% over Q3 last year. For the nine month, sales were US\$ 487 million, down 29% over nine month last year. Taro's net profit for Q3 was US\$ 18 million, down by 87% over Q3 last year. Net profit for 9m FY18 was US\$ 125 million, down by 67% over nine month last year. Taro's net profit for Q3FY18 and 9m FY18 includes a US\$38.0 million expense for the estimated impact of the re-measurement of Taro's estimated net deferred tax asset at December 31, 2017, as a result of the Tax Cuts and Jobs Act in the US.

Emerging Markets

Our sales in emerging markets were at US\$ 189 million for Q3; a growth of 10% compared to the same quarter last year and accounted for 19% of total sales. For the nine month, sales were US\$ 552 million, up by 12% over nine month last year. While the growth was broad-based across various markets, it was partly boosted by the consolidation of the Biosintez acquisition in Russia.

Rest of World Markets

Formulation sales in Rest of World (ROW) markets excluding US and Emerging Markets were US\$ 120 million in Q3FY18, a growth of 6% from Q3 last year and accounting for approximately 12% of revenues. For the nine month, sales were US\$ 346 million, up by 25% over nine month last year. The growth for 9m FY18 was partly boosted by the consolidation of revenues from the acquisition of 14 brands from Novartis in Japan.

Active Pharmaceutical Ingredients (API): Strategic strength

Our API business imparts benefits of vertical integration for our formulations business. We continue to increase the API supply for captive consumption for key products. For Q3FY18, external sales of API were at Rs. 370 crores, flat over Q3 last year. For the nine month, API sales were at Rs. 1,067 crores, down by 11% over nine month last year.
