

Sun Pharma UK Limited Carbon Reduction Plan

Supplier name: Sun Pharma UK Limited

Publication date: 06/11/2025

Commitment to achieving Net Zero

Sun Pharma UK Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022/23 Reporting period: 01/04/2022 - 31/03/2023	
Additional Details relating to the Baseline Emissions calculations.	
We have updated our baseline year calculation to include all downstream transportation and distribution as agreed by BGMA, HDA and ABPI. Our previous CRP figures only included downstream transportation and distribution of goods sold to the NHS.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.00
Scope 2	12.22
Scope 3 (Included Sources)	Employee Commuting (commuting + working from home): 26.33 Business Travel (travel + hotel stays): 39.67 Fuel and Energy Related Activities (not included in scope 1+2): 3.05 Upstream Transportation and Distribution (inbound + outbound logistics): 843.70

	Waste Generated in Operations: 1.37 Downstream Transportation and Distribution : 1,174.78 Total Scope 3: 2,088.89
Total Emissions	2,101.11

Current Emissions Reporting

Reporting Year: 2024/25 Reporting period: 01/04/2024 - 31/03/2025 In this reporting period we have measured all relevant scope 3 emissions for the first time. Our reduction targets are still limited to cover the subset of emissions required for PPN006. As we get better data for our other scope 3 emissions we will look to include these in our reduction targets.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.00
Scope 2	25.69
Scope 3 (Included Sources)	Covered by Target: Employee Commuting (commuting + working from home): 36.55 Business Travel (travel + hotel stays): 39.87 Fuel and Energy Related Activities (not included in scope 1+2): 6.41 Upstream Transportation and Distribution (inbound + outbound logistics): 1,178.93 Waste Generated in Operations: 1.46 Downstream Transportation and Distribution : 1,301.75 Total Scope 3 covered by target: 2,558.56 Additional Scope 3 emissions measured in this reporting period: Purchased Goods and Services: 16,313.48 Capital Goods: 1.93

	End-of-life Treatment of Sold Products: 489.08 Investments: 32.48 Total Scope 3 measured: 19,401.95
Total Emissions	Total covered by target: 2,590.66 Total measured: 19,427.63

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We commit to reducing scope 1, 2 and this subset of scope 3 emissions by 42% by 2030 from a 2023 baseline.

We commit to reducing scope 1, 2 and this subset of scope 3 emissions by 90% by the net zero target year 2045 from a 2023 baseline.

These targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The main source of energy consumption is the serviced office premises in Stockley Park. We had made efforts to reduce energy consumption by regular portable appliance testing to ensure that excessive energy consumption is restricted due to any faulty appliances encouraging employees to power-off instruments when these are not in use. We will also jointly explore the possibility with Stockley Park management of switching to more efficient LED lights within office premises. We recommend employees to consider purchasing Electric Vehicles (EV's) for emission reduction in employee-owned vehicles. We have also implemented a recycling policy for office waste.

Sun Pharma are also members of the Pharmaceutical Supply Chain Initiative (PSCI) to help drive responsible value chains in the pharmaceutical industry.

In the future we plan to implement further measures such as:

Sustainable Freight and Logistics

- Prioritise sea freight over air freight for international inbound product shipments where feasible.
- Optimise freight routing and load consolidation to improve vehicle utilisation.
- Collaborate with logistics providers to identify opportunities for using alternative fuels and technologies.

Business Travel Reduction

- Implement a virtual-first policy for meetings and conferences where appropriate.
- Encourage the use of online collaboration tools to minimise the need for in-person travel.
- When travel is required, promote the use of lower-emission transportation modes like rail.

Sustainable Procurement

- Incorporate carbon emissions as a key criterion in business partner selection and contract renewals.
- Work with business partners to gather emissions data and identify reduction opportunities in the supply chain.
- Incentivise business partners to invest in decarbonisation initiatives through preferential purchasing agreements.

Employee Engagement Campaigns

- Educate employees on the company's carbon footprint and climate action initiatives.
- Encourage employees to adopt sustainable behaviours at work and home through incentive programs.
- Establish a "Green Team" to empower employees to identify and implement emissions reduction projects.

Transparent Reporting

- Calculate and publicly report our Scope 1, 2, and 3 emissions on an annual basis.
- Disclose progress against emissions reduction targets.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
