

**Sun Pharmaceutical Industries Limited**

**CSR PROJECTS APPROVED BY THE BOARD OF DIRECTORS FOR FY 2025-26**

Sl. No.	Thematic Area	CSR Activity / Project Proposal
1.	Health	Mobile Health Care Unit
2.		Support to Cancer/Eye Sanatorium Institute
3.		Community Drinking Water
4.		Healthcare Infrastructure and Awareness
5.		Medicine Supply
6.	Education	Education & Anganwadi Infra
7.		School Health
8.		SMART Classrooms
9.		STEM Lab
10.		Medical & Pharma Research
11.	Climate Action	Disaster Management
12.		Plantation
13.		Solar Lights
14.		Water conservation
15.		Smokeless Chulha Distribution
16.	Sustainable Livelihoods	Entrepreneurship Development and Training
17.		Skill Development and Training (IPA & Others)
18.	Rural Development	Rural Infrastructure Upgradation

**THEMATIC AREA: HEALTH**

**1. Mobile Healthcare Unit:**

Mobile Healthcare Unit programme provides basic healthcare services at the doorstep of communities residing in remote, underserved and unreached areas. The main aim of MHU is to provide services under different thematic areas such as Maternal Health, Neonatal and Infant Health, Child and Adolescent health, Reproductive Health and Contraceptive Services, Prevention and control of Communicable and Non-Communicable diseases in joins hands with Government's Health Department. The MHU programme would be implemented by Sun Pharma Community Health Care Society.

**2. Support towards Setting up of Cancer Sanatorium Institute, Wadala, Mumbai**

In order to support cancer treatment to economically downtrodden people in the society Sun Pharma has proposed this project and the same would be implemented by Shantilal Shanghvi Foundation.

**3. Community Drinking Water**

Water and sanitation are fundamental to good public health. To take this as priority company has proposed to supply Safe Drinking Water to Community in Villages. The project would be implemented in both the manners i.e. directly and with the help of implementing agencies

**4. Healthcare Infrastructure and Awareness**

To strengthen the rural primary Health Centers and Government Hospitals Sun Pharma has planned to support infrastructural upgradation. Our CSR initiative in healthcare is largely for rural residents and

communities located in remote areas. It would be implemented in both the manners i.e. directly and with the help of implementing agencies.

**5. Medicines for Health Activities**

Sun Pharma has planning to provide medicine and materials to the different stakeholders in the society considering many prevalent diseases to underprivileged people. This will protect the people from disease spread and also from treatment of other communicable and non-Communicable diseases. The proposed project would be implemented directly and with the help of implementing agencies.

**THEMATIC AREA: EDUCATION**

**6. Education & Anganwadi Infrastructure Development Programme**

Anganwadi program provides early education and nutrition to 0-6 year olds, lactating mothers and pregnant women. This program is run through anganwadi centres. It is critical that the environs of the anganwadi are child friendly, safe and hygienic. With this intent, Sun Pharma proposed to takes up upgradation of infrastructural facilities near its plant locations. The works such as Construction and Renovation of Buildings, Toilets, Midday meal cooking room, LPG Connection, Play Materials, Providing safe drinking water and educational aids etc.,

Anganwadi Infrastructure Development project would be implemented by Sun Pharma and Implementing Agencies. To improve the educational standards in identified schools Sun Pharma has planned this project to ensure basic educational facilities such as Infrastructure Up-gradation, digital classroom, Provision of potable drinking water for the students, distribution of stationary items, book donation, Celebration of school-based activities etc. It will be implemented directly and indirectly both the ways.

**7. School Health Initiative**

School health focuses on promoting and protecting the physical and mental well-being of students and staff, ensuring a conducive learning environment. It encompasses various aspects like health education, health services, a healthy school environment, and family and community involvement. With this intent, Sun Pharma proposed to takes up annual health camps in Schools along all the plant location. It will be implemented directly and indirectly both the ways

**8. SMART Class**

Sun Pharma propose to provide fully equipped digital classrooms in government-run schools. The classrooms are provided with an intelligent touchpad board, a projector, a computer, a Wi-Fi Internet connection, audio speakers, and licensed software which will help to accelerate learning and performance of students against baseline. To boost rural education system, fully equipped digital classroom has been proposed. Digital learning has been found to be a great aid in livening up the text books on screen. The retention and attention of the students in the class has improved significantly. The teachers now have a powerful tool to explain difficult topics in the curriculum in a more intuitive way. It will be implemented directly and indirectly.

**9. STEM Labs**

Sun Pharma proposes STEM lab in government schools specially designed for students as per course curriculum. Hands-on training, project-based learning in Science, Technology, Engineering, and Mathematics. These labs provide an environment where students can explore concepts, collaborate, and apply their knowledge to solve problems. STEM labs can help students develop a deeper understanding of scientific and mathematical concepts. Students gain valuable skills in problem-solving, critical thinking, creativity, and teamwork. This will help bridge the gap between theory and application, allowing students to see how their knowledge can be used in real-world situations. It will be implemented directly and indirectly.

- 10. Promotion of Scientific Medical & Pharma Research Outcomes for Public Health Improvement**  
In order to improve health standards in the Health sector by sharing of latest Pharma and scientific research, company has continuing this work. This is to promote public health improvements and the project would be implemented through Sun Pharma Science Foundation.

**THEMATIC AREA: CLIMATE ACTION**

**11. Disaster Response:**

To support relief activities, company has proposed to join hands with State and Central Government through Voluntary Organizations in providing relief activities during disaster situation such as, flood, earthquake, epidemic etc. The support would be extended in both the manners i.e., directly and with the help of implementing agencies.

**12. Plantation**

Under Environment conservation Sun Pharma has planned to execute Tree Plantation drives, Miyawaki plantation towards environmental sustainability and awareness generation in schools and communities for sensitizing people towards importance and conservation of environment. The project may be implemented directly by company or through any implementing agency.

**13. Solar Street Lighting Programme**

This initiative will have a favourable impact on the overall well-being of the villages. The prominent benefits of the Solar LED Street Lights are easy movement during evening hours and rainy days, improved sense of security among women and children, contribution towards power for all, and savings on conventional electricity. It will be implemented directly and indirectly. To make the village safer for its residents, Sun Pharma has proposed to install a fully automated solar street lights and would be implemented in both the manners i.e. directly and with the help of implementing agencies.

**14. Water Conservation**

Sun Pharma propose to water neutral company hence water conservation is need of an hour. To contribute to meet future water crises and make water usage sustainable, company has initiated water conservation program. Under this program rain water harvesting projects conducted in schools, government buildings as well as well recharge, bore well recharge in communities

**15. Smokeless Chulha Distribution**

Sun Pharma has undertaken the distribution of smokeless chulhas in nearby villages under its CSR program. This initiative aims to reduce indoor air pollution, enhance fuel efficiency, and improve overall living conditions for rural households that continue to rely on traditional cooking methods.

Traditional chulhas generate high levels of smoke, exposing women and children to harmful pollutants that can lead to respiratory illnesses, eye irritation, and long-term health complications. The smokeless chulhas distributed by Sun Pharma offer a cleaner and more efficient alternative by significantly reducing smoke emissions and ensuring better heat utilization. This not only contributes to healthier kitchens but also results in reduced fuel consumption, thereby lowering the financial burden on families and decreasing pressure on local firewood resources.

Through this initiative, Sun Pharma reinforces its commitment to community health by empowering rural households with simple, sustainable, and impactful solutions. The smokeless chulha program stands as a meaningful step toward improving rural health outcomes, supporting environmental conservation, and enhancing the overall quality of life in the communities surrounding its operational areas. The program would be implemented by Implementing Agency.

## **THEMATIC AREA: SUSTAINABLE LIVELIHOODS**

### **16. Skill Development Training Programme**

Skilling is important and dire needs of local youths. Youths from surrounding villages would be identified. They would be imparted Skill Development training and would be placed in some jobs available with industries. The project would be implemented directly and indirectly both.

### **17. Entrepreneurship development**

To equipping local unemployed individuals with the necessary skills, knowledge, and motivation to create and manage successful businesses. It involves fostering an environment where aspiring entrepreneurs can identify opportunities, take calculated risks, and innovate. This development often involves training, coaching, and networking opportunities to help turn ideas into viable business ventures. The project would be implemented directly and indirectly both.

## **THEMATIC AREA: RURAL DEVELOPMENT**

### **18. Rural Infrastructure Development Programme**

Considering village self-reliant Sun Pharma is proposing to support basic and necessary things in the villages. Under rural asset creation Sun Pharma shall take up Rural Development projects aimed at improving and setting up of basic amenities for the villages and the fund will be spent directly and indirectly.
