Our Commitment to Community

1 Overview of Sun CSR

About Sun Pharmaceutical Industries Limited

From humble beginnings in **1983**, Sun Pharma has grown rapidly to become India's largest pharmaceutical company with annual revenues over **USD 6.5 billion**. It is driven by a strong commitment to research and development, serving healthcare professionals and patients across more than **100 countries**. With six state-of-the-art R&D centres, over **40 manufacturing sites**, and a diverse workforce of **47,000+**, Sun Pharma is helping build a healthier world through its vision of 'Reaching People & Touching Lives' globally.

Catalysing Change, Empowering Communities

At Sun Pharma, our commitment to communities is rooted in our vision of Reaching People, Touching Lives. Through strategic collaborations and outcome-focused philanthropic initiatives, we drive holistic development across Health, Education, Livelihood, and Climate Action to create sustainable and meaningful impact.

Our approach places communities at the centre—aligning national priorities with local needs and aspirations. By empowering individuals, groups, and stakeholders, we focus on achieving measurable outcomes and ensuring their long-term sustainability. Together with our partners, we strive to build healthier, more resilient and empowered communities for a better tomorrow.

Through focused interventions, we have positively reached **4.7 million** lives across **16** states in India. Complementing this scale, our intensive and comprehensive engagement across **257 villages** reflects a deeply rooted approach to grassroots development, spanning primary healthcare, quality education, environmental conservation, and sustainable livelihoods, driving lasting, community-led transformation..

CSR

Vision and Mission

Vision

We aim to achieve comprehensive development for underserved communities in a sustainable and meaningful way.

Mission

We will leverage our people, expertise, and connections to meet the needs of the communities we serve, thereby promoting overall development.

I. Health

Affordable, Accessible, Available

Improving access to primary healthcare in rural and semi-urban areas and supporting local health systems.

Key Interventions:

Mobile Healthcare Units (MHUs):

We operate 11 MHUs across 188 villages, providing primary care, maternal and child health, and NCD screenings. These clinics on wheels provide **240,000+ annual consultations**, covering preventive, promotive, curative, and rehabilitative services. Our MHUs also promote cancer awareness, teach self-breast examination, and now offer AI-powered eye screenings for diabetic retinopathy and glaucoma using the FOP handheld fundus camera.

Strengthening Public Health Infrastructure:

Sun CSR upgrades Primary Health Centres (PHCs), Community Health Centres (CHCs), and Sub-Centres with enhanced infrastructure, advanced medical equipment, safe drinking water, sanitation facilities, and free medicines. To date, **73 healthcare facilities** benefiting **2.19 million beneficiaries**.

Cancer Care:

SUNKalp is a community-based initiative focused on early cancer screening and treatment. The project aims to reduce the cancer burden through timely awareness, timely detection and improved access to treatment and rehabilitation. Since its inception in 2024, 100 camps have been conducted, screening 15,357 individuals, with 11 patients currently under treatment.

Safe Drinking Water:

Our community water programs ensure safe drinking water through storage tanks, pipelines, tube wells, and water ATMs, reducing waterborne diseases and improving overall health outcomes.

80 water systems installed in community setting and in schools providing access to clean drinking water to **2.42 lakh** persons

Preventive Healthcare and Awareness:

Initiatives such as Making India Heart Strong focus on building community resilience by training individuals in CPR to respond to sudden cardiac arrests, particularly in public spaces. To date, over 1,00,000 first responders have been trained.

In addition, school-based eye check-up programmes have been conducted across 42 schools in Delhi, providing free eye screenings to more than 45,000 students.

These initiatives play a crucial role in strengthening grassroots health awareness and early intervention practices.

II. Education

Quality Education for All

Creating and enabling an environment of learning by supporting early childhood education, infrastructure upgradation, foundational literacy, and digital learning.

Comprehensive School Development:

Through 'SUnvidya', our integrated school development program, we supported **28,000+** schools through infrastructure upgradation, setting up of digital classrooms, and strengthening teacher capabilities. This initiative has benefited over **2.28 million** students across rural and semi-urban areas.

Anganwadi Development Programme:

This initiative focuses on constructing new centres and renovating existing ones, ensuring safe and inclusive spaces for early childhood development. **200+** anganwadis reached nearly **10,000** children across Gujarat, Maharashtra and Tamil Nadu.

III. Sustainable Livelihoods

Creating Economic Independence

Sun Pharma's livelihood programmes equip individuals - especially women and youth with the skills, resources, and mentorship to build sustainable incomes.

Skill Training:

Our skilling programmes provide market-relevant technical and managerial expertise, along with life skills, to underserved communities. These initiatives empower individuals to secure employment and contribute meaningfully to their communities. Nearly **3000** skilled in employable skills - **70%** are women.

Entrepreneurship Development:

We support women-led enterprises, nurturing local innovators and strengthening grassroots economies through entrepreneurship development programmes and sewing training cum production centres. Through access to resources, guidance, and market linkages, women entrepreneurs build successful businesses that drive sustainable development and create lasting impact. **500+ women** trained in entrepreneurship.

IV. Climate Action

A livable planet for All

Protecting our shared environment through water conservation, afforestation, and clean energy.

Water Conservation

Addressing the realities of climate change begins with safeguarding one of our most precious resources: water. We work closely with communities and local partners to design practical and sustainable solutions that respond to local needs.

Our initiatives span watershed development, rainwater harvesting, and the restoration of local water bodies, alongside the promotion of efficient agricultural practices. We also emphasize the adoption of micro-irrigation techniques to improve water use efficiency and support water budgeting exercises with local communities to encourage responsible and equitable usage.

These efforts foster a sense of shared responsibility towards water conservation and are implemented in collaboration with local governments, civil society organizations, and partner foundations, ensuring long-term sustainability and community ownership.

As against the target of 10.4 mKL, achieved 9.25mKL water storage capacity created (cumulatively)

Afforestation:

To combat climate change, we green community spaces, farmlands, and schools through tree plantation drives using traditional and Miyawaki methods. Our focus: nurturing saplings and maintaining vibrant green spaces. **2.15 million** trees, restoring biodiversity and shade in **7** states.

Renewable Energy:

We promote clean energy for safer, healthier communities. Our efforts include the installation of solar rooftop systems in schools and Primary Health Centers (PHCs), ensuring reliable power for education and healthcare. We also install solar streetlights in villages, enhancing safety and reducing carbon footprints. To further improve lives, we introduce **Advanced Cookstoves (ACS)** that ease the burden on women, reduce indoor air pollution, and create healthier homes. So far, **12,600+** households have adopted improved cookstove technology, and **3,500+** solar lights have been installed across communities.
